PERSONALITY, ATTITUDE, & VALUES

AGENDA

PERSONALITY

- A) DEFINITION & DETERMINANTS
- B) BIG 5 PERSONALITY THEORY
- B) HOLLAND'S JOB TYPOLOGY

VALUES

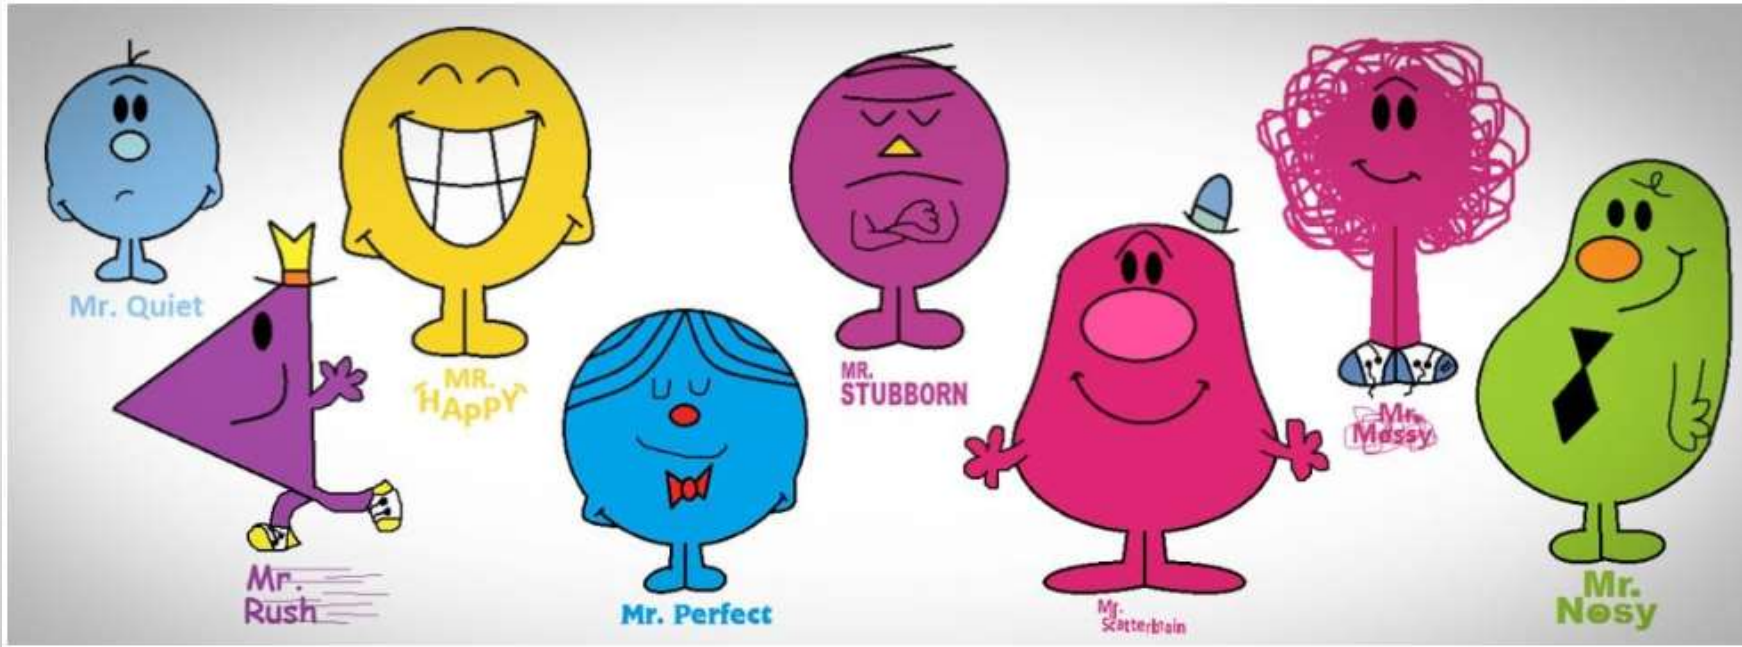

- I. TERMINAL VALUES, INSTRUMENTAL VALUES
- II. DOMINANT VALUES OF TODAY'S WORKFORCE

ATTITUDE

- I. DEFINITIONS & FACTORS INFLUENCING ATTITUDE
- II. COMPONENTS OF ATTITUDE
- III. MAJOR JOB ATTITUDES

PERSONALITY

PERSONALITY

Source- [Can I change my personality? | Umbrella Wellbeing Ltd](#) (Used for academic purposes)

PERSONALITY

*“PERSONALITY IS THE SUM TOTAL OF
WAYS IN WHICH AN INDIVIDUAL
REACTS TO AND INTERACTS WITH*

personality *Enduring characteristics
that describe an individual's behavior.*

DETERMINANTS OF PERSONALITY

1. HEREDITY

- TRAITS DETERMINED AT CONCEPTION, INFLUENCED BY GENETIC FACTORS.
- INCLUDES PHYSICAL ATTRIBUTES, TEMPERAMENT, ENERGY LEVELS, AND BIOLOGICAL

2. Environment

- Culture:** Shapes values, attitudes, and behavior.
- Family:** Early conditioning, role models, and reinforcement patterns from parents and siblings.
- Social Groups:** Peer influences and societal norms.
- Life Experiences:** Impact of significant life events and education.

3. Situation

- Personality can be dynamic and vary based on situational factors.
- Certain traits may be expressed more strongly in specific contexts (e.g., stress, workplace, or social settings).

These determinants interact to shape an individual's personality, with heredity providing the foundational traits and environment and situational factors influencing their expression and development.

MEASURING PERSONALITY

THE BIG FIVE PERSONALITY MODEL

❑ BIG FIVE PERSONALITY MODEL IS A PERSONALITY ASSESSMENT MODEL THAT TAPS FIVE BASIC DIMENSIONS OF HUMAN PERSONALITY

Dimension	Definition
1) Extraversion	dimension captures our comfort level with relationships. Extraverts tend to be gregarious, assertive, and sociable. Introverts tend to be reserved, timid, and quiet
2) Agreeableness	dimension refers to an individual's propensity to defer to others. Highly agreeable people are cooperative, warm, and trusting. People who score low on agreeableness are cold, disagreeable, and antagonistic.

MEASURING PERSONALITY

THE BIG FIVE PERSONALITY MODEL

❑ BIG FIVE PERSONALITY MODEL IS A PERSONALITY ASSESSMENT MODEL THAT TAPS FIVE BASIC DIMENSIONS OF HUMAN PERSONALITY

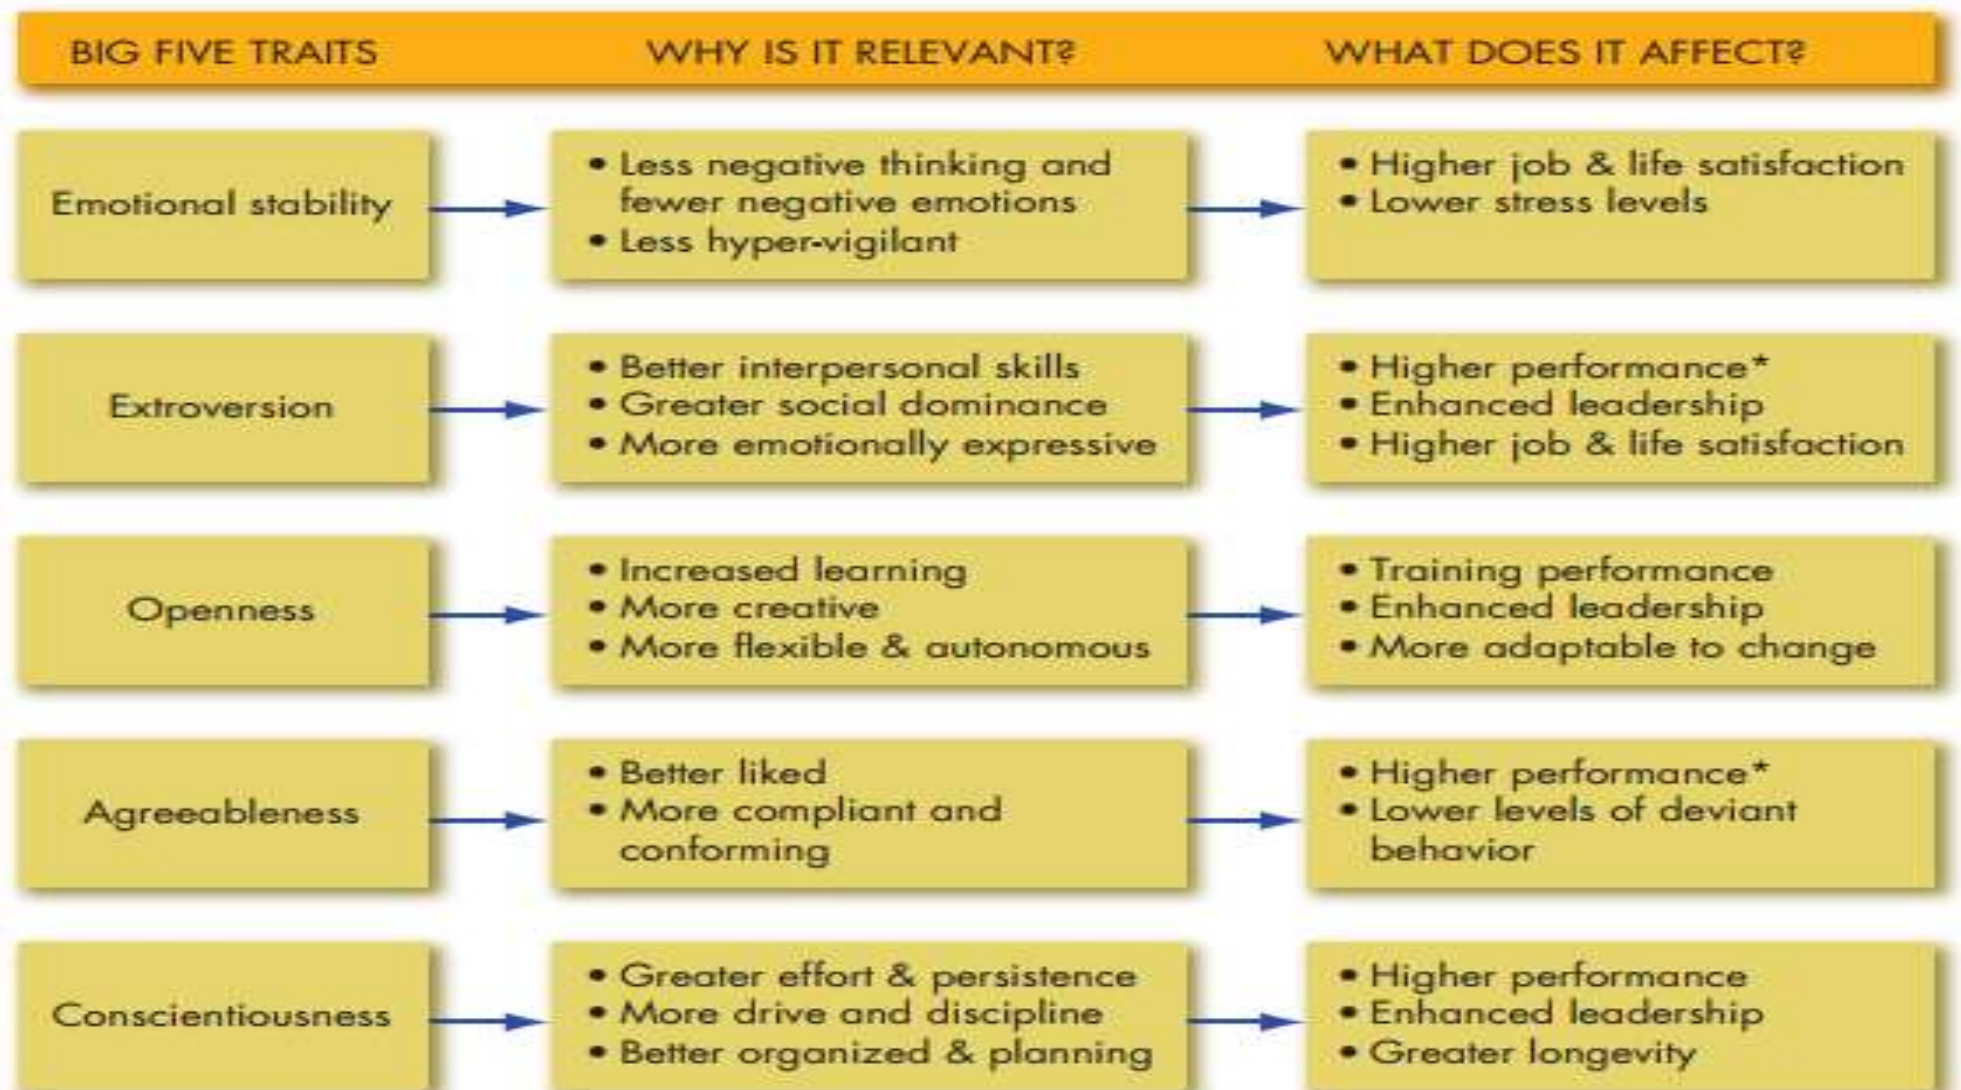

Dimension	Definition
3) Conscientiousness	dimension is a measure of reliability. A highly conscientious person is responsible, organized, dependable, and persistent. Those who score low on this dimension are easily distracted, disorganized, and unreliable
4) Emotional stability	The emotional stability dimension—often labeled <u>by its converse, neuroticism</u>—taps a person's ability to withstand stress. People with positive emotional stability tend to be calm, self-confident, and secure. Those with high negative scores tend to be nervous, anxious, depressed, and insecure

MEASURING PERSONALITY

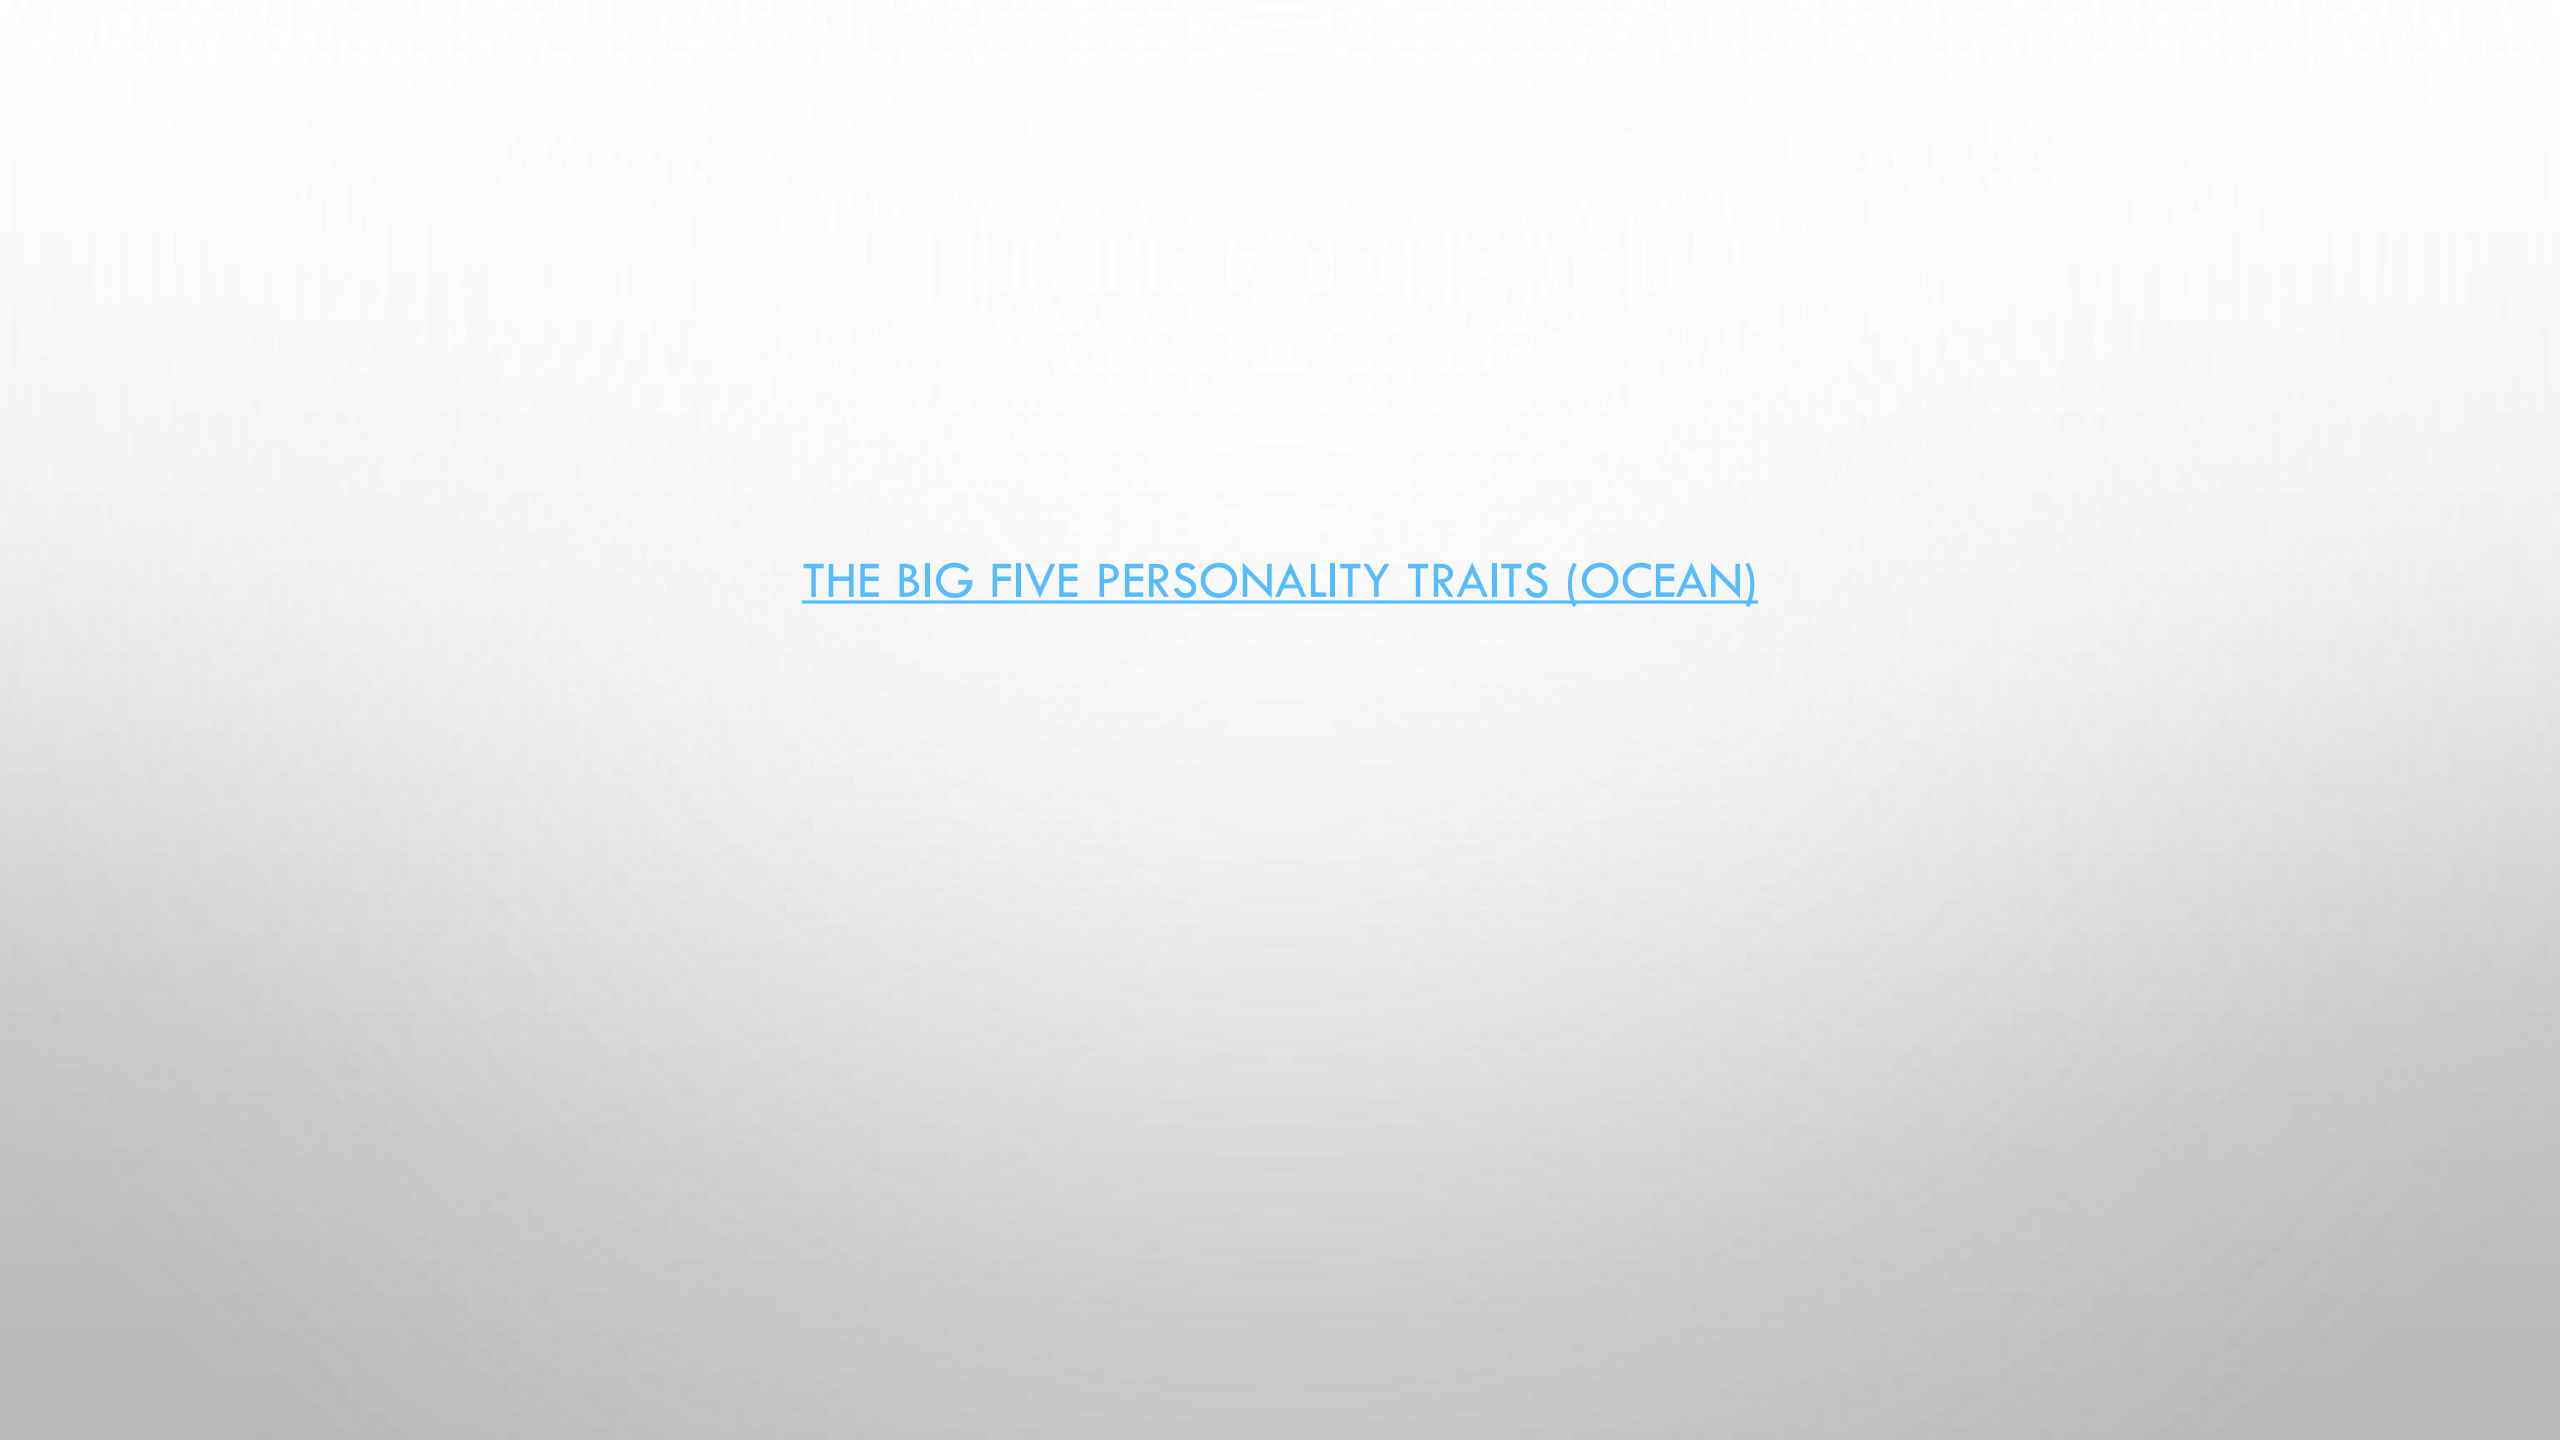

THE BIG FIVE PERSONALITY MODEL

❑ BIG FIVE PERSONALITY MODEL IS A PERSONALITY ASSESSMENT MODEL THAT TAPS FIVE BASIC DIMENSIONS OF HUMAN PERSONALITY

Dimension	Definition
5) Openness to experience	dimension addresses range of interests and fascination with novelty. Extremely open people are creative, curious, and artistically sensitive. Those at the other end of the category are conventional and find comfort in the familiar

Synopsis

India's top IT companies saw a dramatic hiring slowdown, adding only 17 net employees in nine months, a stark contrast to last year's 17,764. This shift, driven by tighter demand and AI adoption, is reshaping the industry. TCS alone shed over 25,000 staff, signaling a move away from traditional growth models towards efficiency and productivity.

HOLLAND'S JOB TYPOLOGY

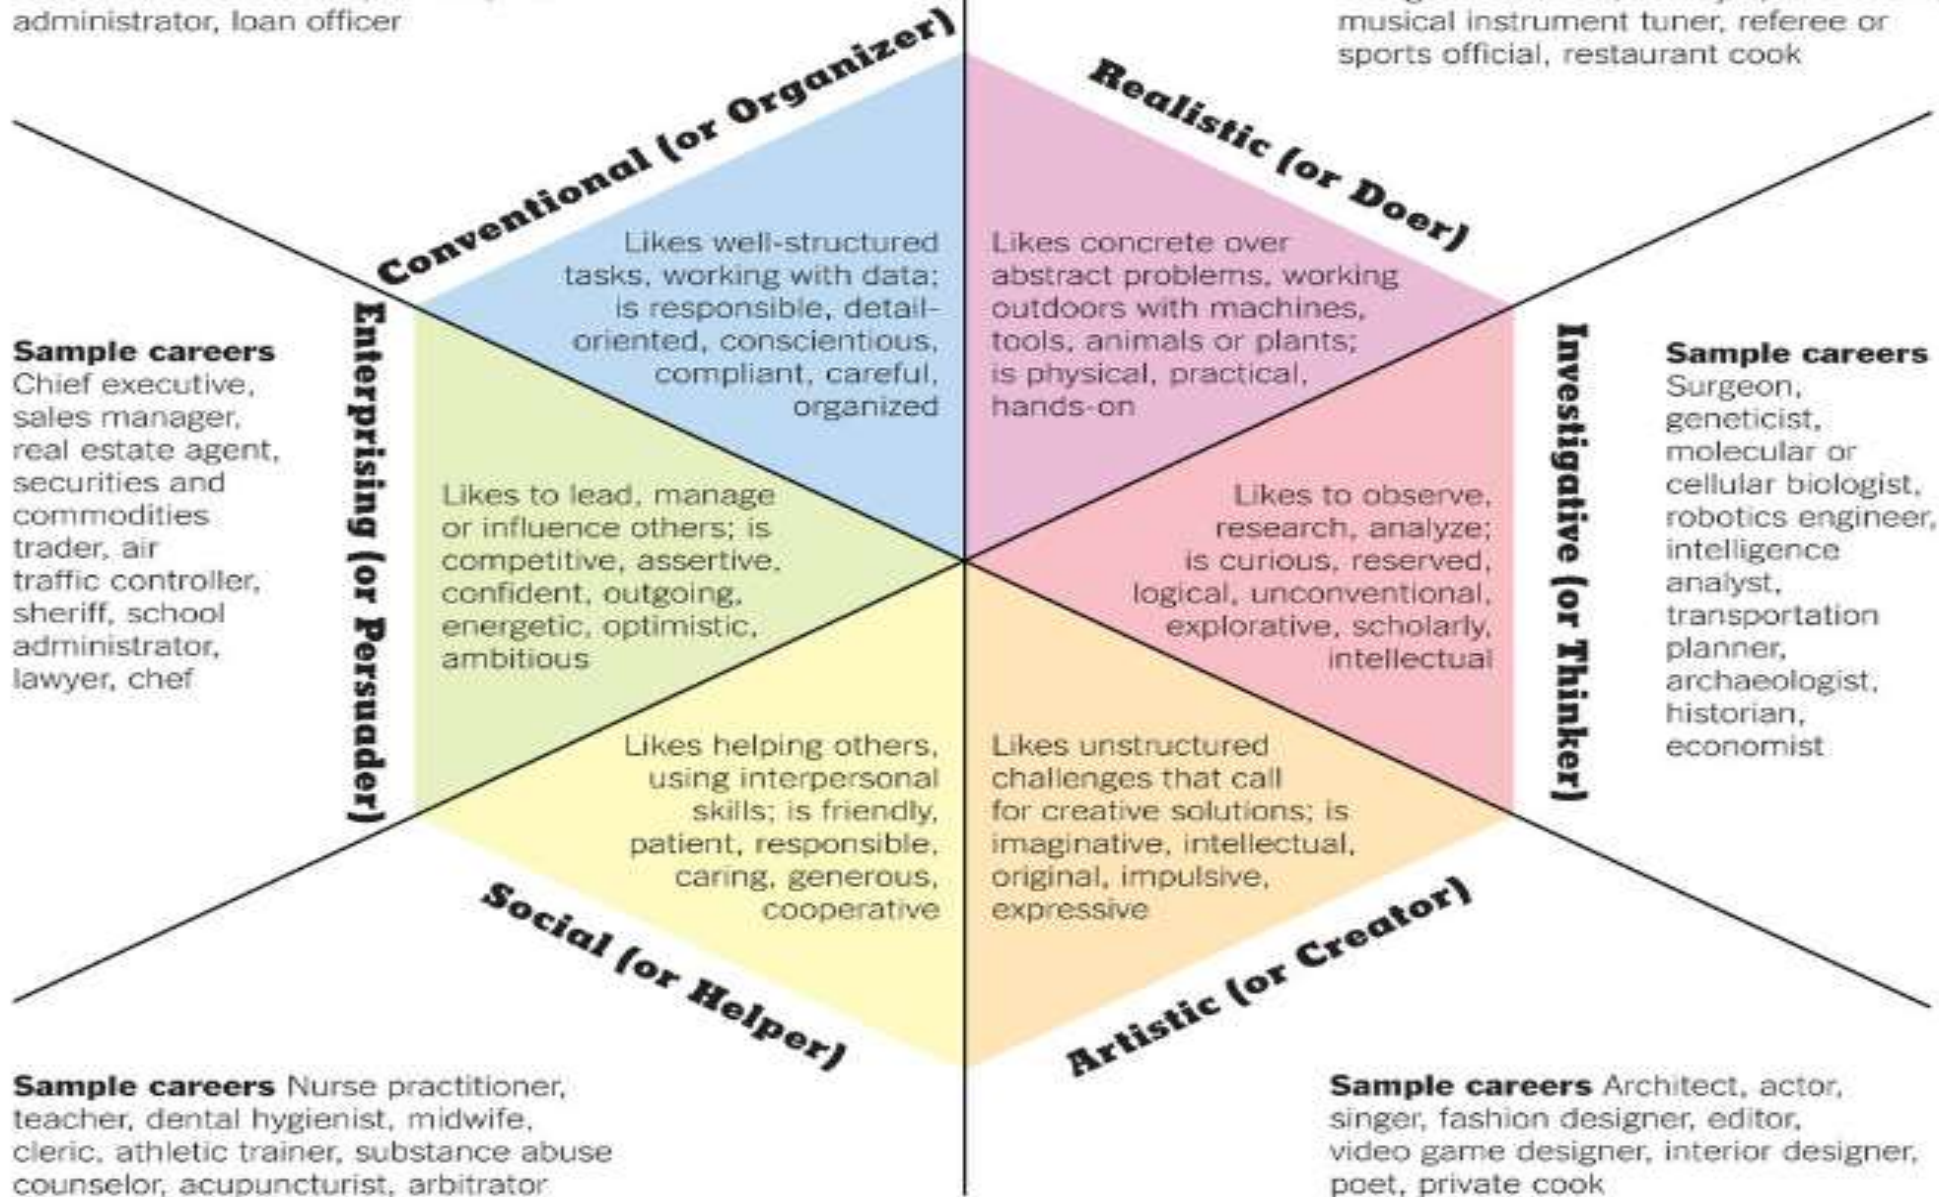

- JOHN HOLLAND, PH.D., PROFESSOR EMERITUS AT JOHNS HOPKINS UNIVERSITY, WAS A PSYCHOLOGIST WHO DEVOTED HIS PROFESSIONAL LIFE TO RESEARCHING ISSUES RELATED TO CAREER CHOICE AND SATISFACTION.
- It emphasizes the alignment between personality traits and work environments, suggesting better job satisfaction and performance when a person's type matches their occupational environment. It's widely used in career counseling
- HOLLAND FOUND THAT PEOPLE NEEDING HELP WITH CAREER DECISIONS CAN BE SUPPORTED BY UNDERSTANDING THEIR RESEMBLANCE TO THE FOLLOWING SIX IDEAL VOCATIONAL PERSONALITY TYPES
 - REALISTIC, INVESTIGATIVE, ARTISTIC, SOCIAL, ENTERPRISING, AND CONVENTIONAL. SOME REFER TO THESE AS HOLLAND CODES OR RIASEC.
 - [HTTPS://OPENPSYCHOMETRICS.ORG/TESTS/RIASEC/](https://openpsychometrics.org/tests/riasec/)

Holland's Theory of Career Choice

Sample careers Accountant, archivist, librarian, financial analyst, statistician, database administrator, auditor, web administrator, loan officer

Sample careers Civil engineer, museum conservator, airline pilot, fish and game warden, surveyor, electrician, musical instrument tuner, referee or sports official, restaurant cook

VALUES

VALUES

- Values are **long lasting and stable beliefs** about what is good or what is bad.
- Values are defined in organizational behavior as the collective conceptions of ***what is considered good, desirable, and proper*** or bad, undesirable, and improper in a culture.
- Contains a judgmental element
- Individual's ideas as to what is right, good, or desirable

VALUES

- Values lay the foundation for our understanding of people's attitudes and motivation and influence our perceptions

**Can you identify a value in this image?
What could be the probable effect on work related attitudes?**

VALUES

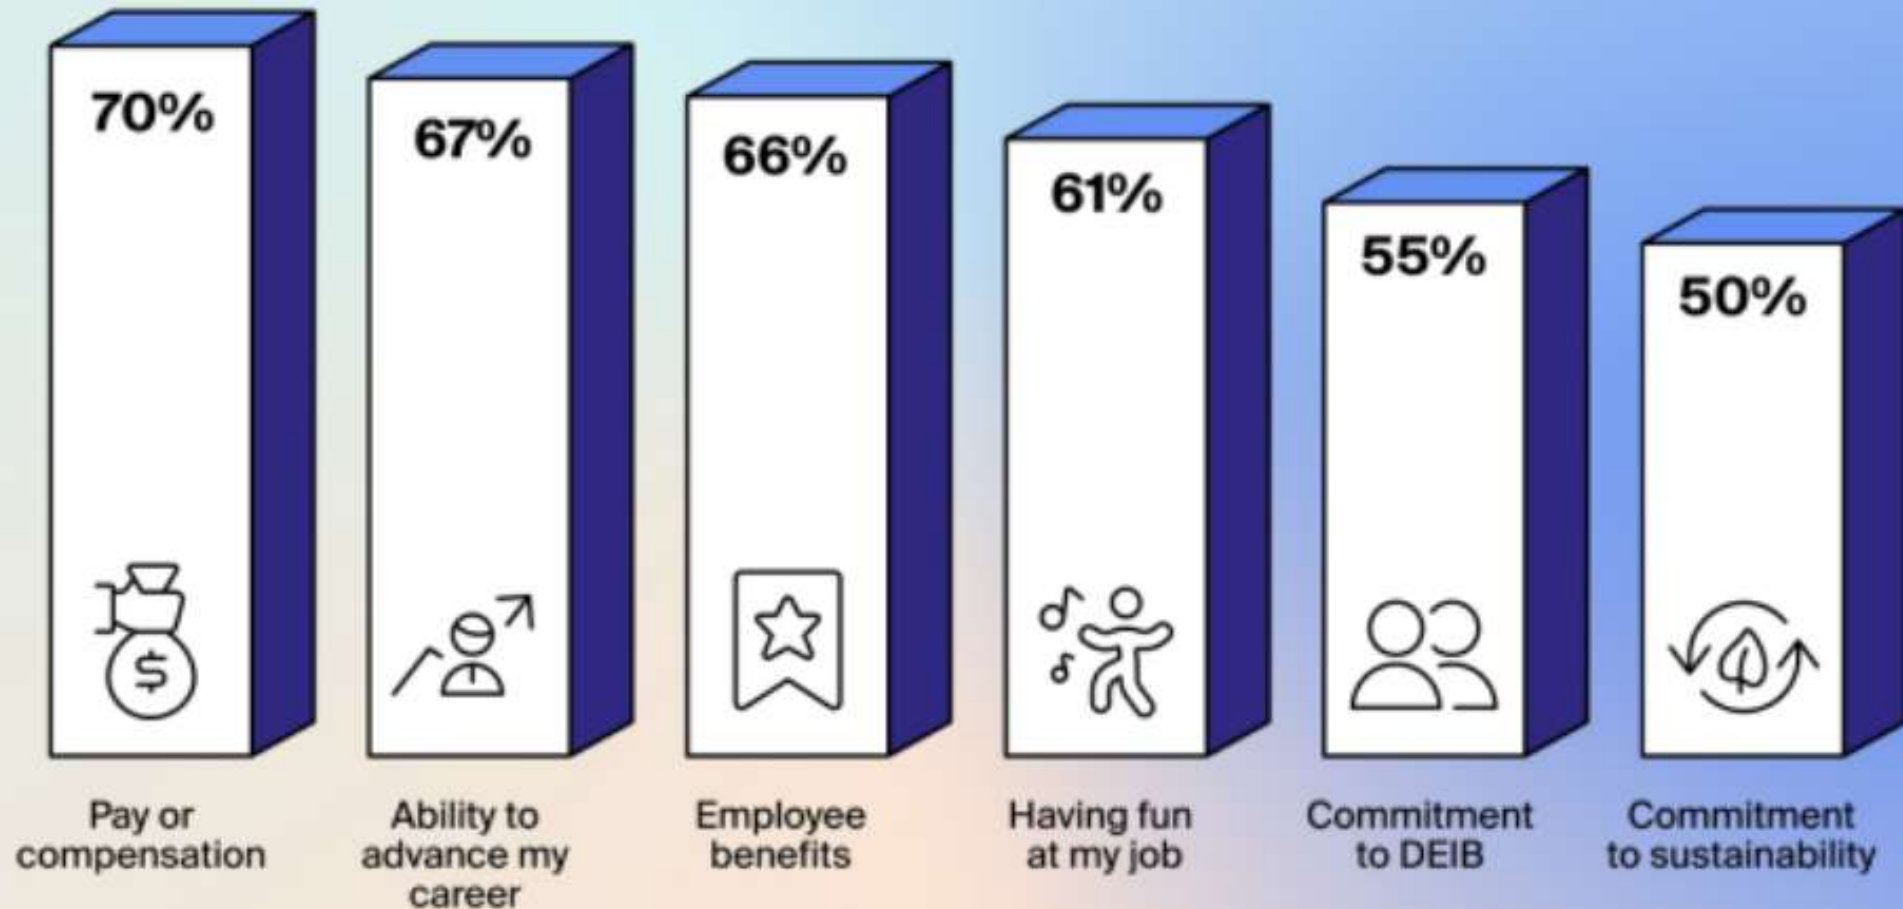

➤ **TERMINAL VALUES** - Refers to **desirable end-states**. These are the goals a person would like to achieve during his or her lifetime.

INSTRUMENTAL VALUES, Refers to preferable **modes of behavior**, or means of **achieving the terminal values**.

Values	Examples
Terminal Values	Prosperity and economic success, Freedom, Health and well-being
Instrumental Values	Self-improvement, Autonomy and self-reliance, Personal discipline, kindness, Ambition, and Goal-orientation

Job factors Gen Z ranks as extremely important

Leave for pet & music shows! Indian tech cos woo millennials and Gen Z with unique perks

Synopsis

Indian tech companies are rolling out innovative perks like unlimited sick leave, mental health days, and time off for family to attract and retain millennial and Gen Z employees. The trend reflects a shift towards prioritizing work-life balance, mental well-being, and personalized work arrangements to boost productivity and prevent burnout among the younger workforce.

India's tech industry is going the extra mile to make workplaces more appealing for millennial and Gen Z employees, according to a ToI report. Companies are introducing unique benefits such as unlimited sick leave, mental health days, and time off to spend with pets or aging grandparents, aiming to boost productivity and retain the young workforce.

Deepti Sagar, chief people and experience officer at Deloitte South Asia, highlights the shift in workforce dynamics driven by Gen Z, who now make up over 50% of the company's workforce. "Today, talent is asking us why they should join Deloitte, rather than us asking why they want to work here," she says. Gen Z's emphasis on purpose, flexibility, and wellbeing has reshaped HR practices at Deloitte.

Synopsis

A Naukri survey reveals over one in three Gen Z professionals in India are unwilling to stay in a job longer than two to three years. They prioritize growth, work-life balance, and mental well-being. Frequent job changes are linked to unmet expectations in learning and balance, not just pay hikes. Transparency is key for Gen Z in corporate India.

ATTITUDE

ATTITUDE

- **Attitudes** are evaluative statements—either favorable or unfavorable—about objects, people, or events.
- Attitude is the willingness to respond (disposition to react) positively (favorably) or negatively (unfavorably) to the object
- They reflect how we feel about something. When I say “I like my job,” I am expressing my attitude about work
- Attitudes are complex

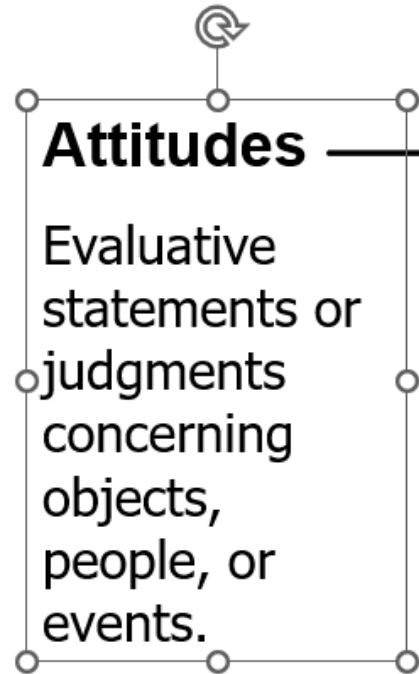

FACTORS INFLUENCING ATTITUDE

- **Past experience** - Attitudes form directly as a result of experience. They may emerge due to direct personal experience, or they may result from observation
- **Social factors**
- Social roles and social norms can have a strong influence on attitudes.

Social roles relate to how people are expected to behave in a particular role or context. Social norms involve society's rules for what behaviors are considered appropriate.

- **Classical conditioning** – learning theory that proposes the use of neutral stimuli to evoke a specific involuntary response. E.G. Advertisements to create a favourable attitude towards a product

3 COMPONENTS OF ATTITUDE

Cognitive component

The opinion or belief segment of an attitude.

Knowledge, opinion, beliefs

Affective Component

The emotional or feeling segment of an attitude.

Feeling & Emotion

Behavioral Component

An intention to behave in a certain way toward someone or something.

Actions

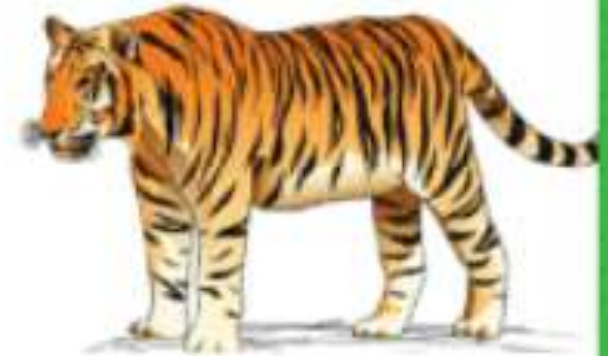

Cognitive

Tiger can eat human beings

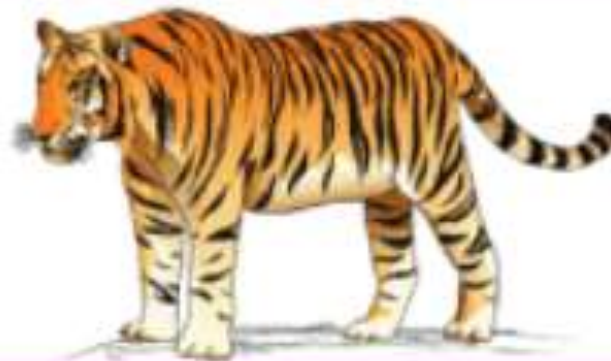

Affective

I am scared of Tigers

Behavioural

I will scream and run away when I see a tiger

Cognition, affect, and behavior are closely related.

Cognitive = evaluation

My supervisor gave a promotion to a coworker who deserved it less than me. My supervisor is unfair.

Affective = feeling

I dislike my supervisor!

Behavioral = action

I'm looking for other work; I've complained about my supervisor to anyone who would listen.

Negative
attitude
toward
supervisor

```
graph LR; C["Cognitive = evaluation<br/>My supervisor gave a promotion to a coworker who deserved it less than me. My supervisor is unfair."] <--> A["Affective = feeling<br/>I dislike my supervisor!"]; A <--> B["Behavioral = action<br/>I'm looking for other work; I've complained about my supervisor to anyone who would listen."]; C <--> NA((Negative attitude toward supervisor)); A <--> NA; B <--> NA; C <--> A; A <--> B
```

The diagram illustrates the components of an attitude and their relationship to a specific negative attitude. On the left, three yellow rectangular boxes are stacked vertically, each representing a component: Cognitive (evaluation), Affective (feeling), and Behavioral (action). Each box contains a descriptive statement. On the right, an orange circle represents the overall attitude: 'Negative attitude toward supervisor'. Double-headed blue arrows connect each of the three component boxes to the central circle, indicating that each component contributes to and is influenced by the overall attitude. Additionally, double-headed blue arrows connect the three component boxes to each other, showing their interrelated nature.

MAJOR JOB ATTITUDES

Job Attitude	Definition	Importance (Outcomes)
1) Job satisfaction	a positive feeling about a job, resulting from an evaluation of its (Job's) characteristics	A person with a high level of job satisfaction holds positive feelings about his or her job, while a person with a low level holds negative feelings. → Job Performance & Turnover
2) Job involvement	the degree to which people identify psychologically with their job and consider their perceived performance level important to self-worth.	Employees with a high level of job involvement strongly identify with and really care about the kind of work they do. -→ Performance, Productivity

MAJOR JOB ATTITUDES

Job Attitude	Definition	Importance (Outcomes)
3) Psychological Empowerment	employees' beliefs in the degree to which they influence their work environment, their competence, the meaningfulness of their job, and their perceived autonomy	High levels psychological empowerment are positively related to job performance
