Theories of Motivation

Chapter -4

5 bankers took part in a discussion during their promotion Group Discussion. The subject of their discussion was:
“Why do people get motivated to do anything?”

The main portions of their discussion are as under:

Banker 1 : “People work because they want to deposit wealth enough to protect themselves from diseases and to be relieved of the tension of old age.”

Banker 2 : “People work because they want to arrange food, cloth and shelter for themselves at any rate.”

Banker 3 : “People work because they want to reach the top of the field in which they are. They, therefore, put in untiring efforts.”

Banker 4 : “People work, so that when they have money, people will become friendly with them and they will stand by them through thick and thin.”

Banker 5 : “People work, so that they may get respect in the society and that they may be recognized as exceptional persons.”

Why do we do what we do ?

Motivation

The term motivation describes **why** a person does something.

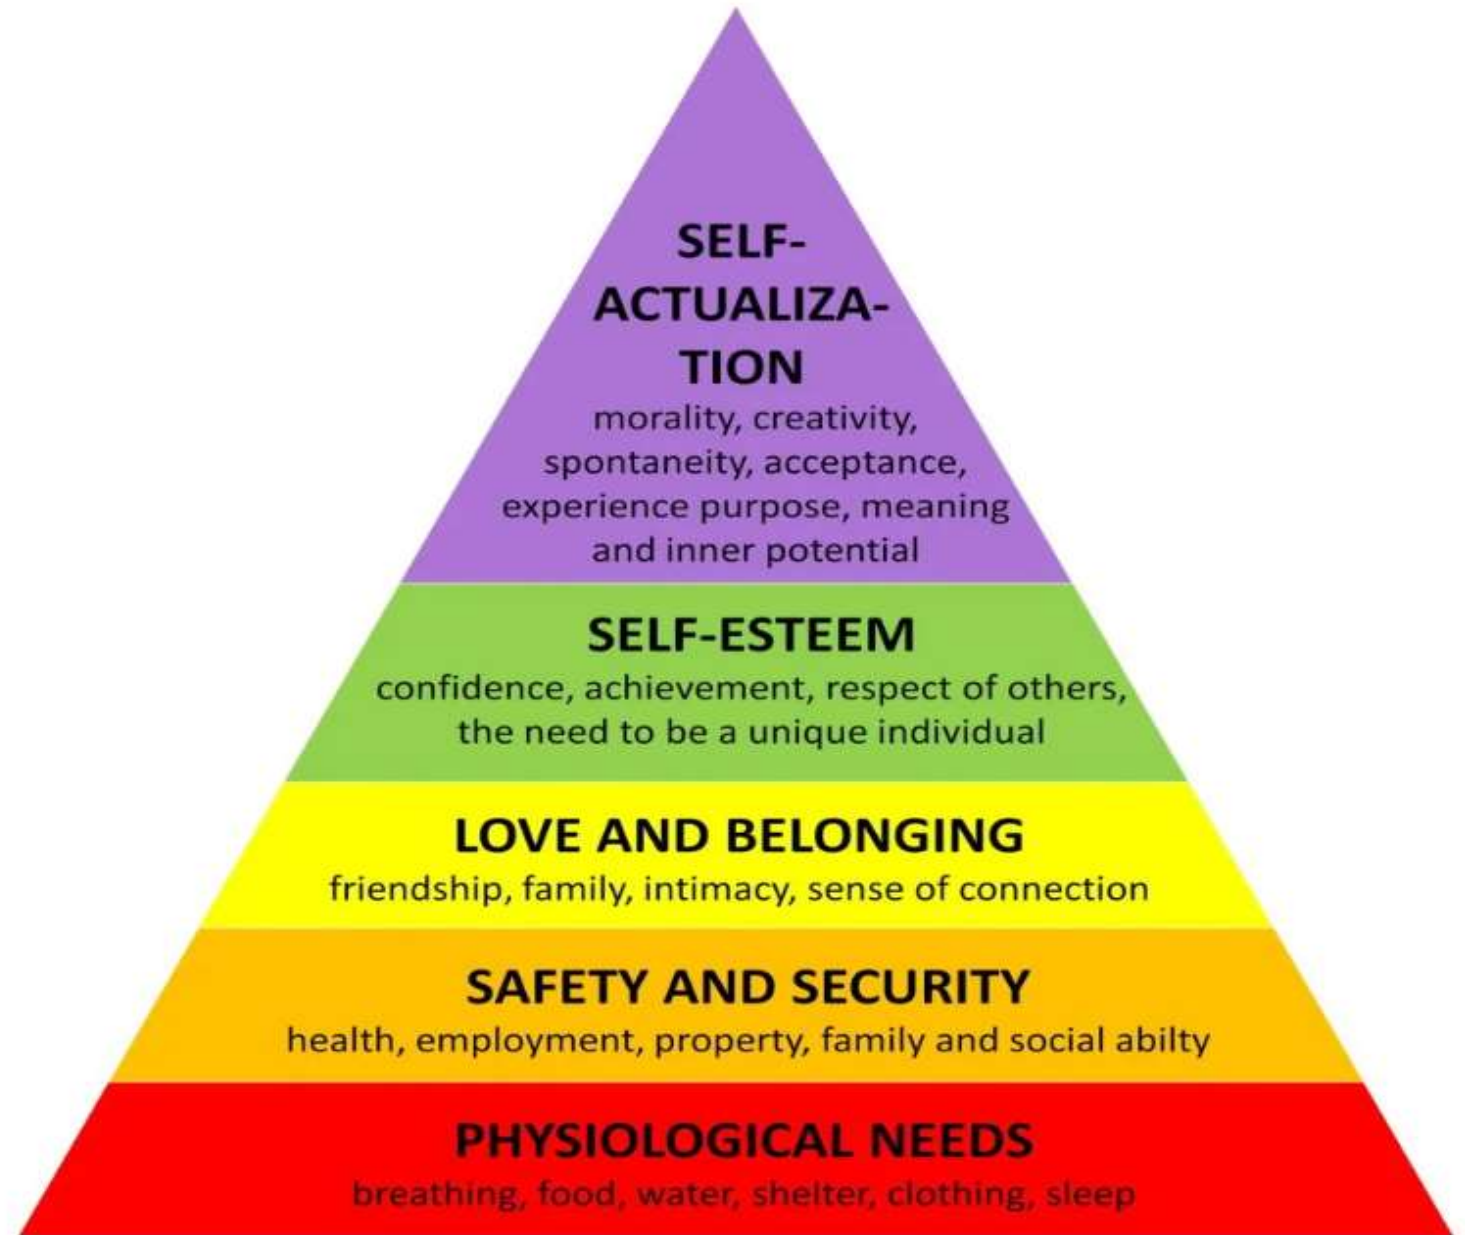

It is the **driving force** behind human **actions**.

Motivation is the process that initiates, guides, and maintains **goal-oriented behaviors**.

1) Maslow's need hierarchy theory

- *According to Maslow (1943, 1954), human needs were arranged in the form of a hierarchy, with physiological (survival) needs at the bottom, and the more creative and intellectually oriented 'self-actualization' needs at the top.*
- *Maslow argued that survival needs must be satisfied before the individual can satisfy the higher needs.*
- *The higher up the hierarchy, the more difficult it is to satisfy the needs associated with that stage, because of the interpersonal and environmental barriers that inevitably frustrate us.*

Maslow's need hierarchy theory

Maslow's Theory at Work

2) Herzberg's two-
factor
theory

Psychologist Frederick Herzberg
wondered,

***“What do people want from their
jobs?”***

He asked people to describe,
in detail, situations in which they felt
exceptionally *good* or *bad* about their
jobs

Hertzberg's two-factor theory

- The responses differed significantly for exceptionally *good AND bad* about their jobs
- He concluded that – Factors that satisfy people are clearly distinct from the factors that dissatisfy them

- **Motivation factors:** factors that are related to workplace satisfaction. They cover intrinsic needs such as achievement, recognition, and advancement. Motivation factors allow employees to be content in their jobs and promote growth.
- **Hygiene factors:** factors that are not related to workplace satisfaction but must be present in the workplace in order to prevent dissatisfaction. Hygiene factors cover extrinsic needs such as pay grade, workplace policy and relationships with their peers.

Herzberg's Two Factors Theory

Motivation Factors

Achievement
Recognition
Advancement
Work
Possibilities of growth
Responsibility

Hygiene Factors

Company Policy and
Administration
Technical Supervision
Inter-personal relations with
Supervisor
Inter-personal relations with
Peers
Inter-personal relations with
Subordinates
Salary
Job Security
Personal life
Working Conditions

3) Reinforcement theory of Motivation

- Reinforcement Theory of motivation aims at achieving the desired level of motivation among the employees by means of reinforcement, punishment and extinction.

Reinforcement theory of Motivation

- *Reinforcement theory says that **behavior is driven by its consequences.***
- *As such, **positive behaviors** should be **rewarded** positively.*
- ***Negative behaviors** should not be rewarded or should be **punished.***

Reinforcement theory of Motivation “Reinforcement”

Reinforcement - Used to increase
desired behavior

- **Positive reinforcement** : encouraging the desired behavior to repeat in the future by **rewards**. For example, providing an employee with extra days off for good performance in their job.
- **Negative reinforcement** is encouraging the desired behavior to repeat in the future by **removing or avoiding an aversive stimulus**. E.g. lowering the tedious task or assignments to an employee who did well in a consulting project

Microsoft announce unlimited leave policy for employees

Microsoft announce unlimited leave policy for employees

Become a corporate leader with IIM Kozhikode's Advanced Strategic...

Microsoft has announced a liberal and flexible leave policy for its employees. As per the new leave policy, Microsoft employees in the US will be able to take

Microsoft is creating more reasons why anybody would want to work with it. The software giant is upgrading its four weeks policy to unlimited time off for its US employees. Microsoft's chief people officer Kathleen Hogan announced this via memo first spotted by The Verge. Reportedly, this leave format can be availed by all salaried employees at Microsoft US. The changes are said to go live from January 16. Microsoft is calling this unlimited time off "Discretionary Time off". It is basically a paid time off granted to an employee for his or her noteworthy achievement or contribution to the organization. Apart from the new unlimited time off, Microsoft also offers 10 corporate holidays, sick time off, mental health time off, leaves of absence, as well as time away from jury duty or bereavement.

Reinforcement theory of Motivation “Punishment”

- **Positive punishment** involves the **delivery of an aversive stimulus**, such as criticism, to affect behavior (coming late).
- Negative punishment **removes a pleasant stimulus** – People being provided with flexible work hours ---→ If they start coming late --→ negative punishment (removes a pleasant stimulus) – i.e remove flexible work hours

Reinforcement theory of Motivation “Extinction”

- Extinction- **implies absence of reinforcements.**
- Scenario: *Everyone has to work overtime and even spare their weekends. You provide them overtime pay for their efforts.*
- *After the completion of the project, you stop providing any incentives and soon this learned behavior of working overtime ends.*

Goal-setting theory

- **Edwin Locke** proposed that intentions to work toward a goal are a major source of work motivation

Important aspects of Goal Setting theory

Goal-setting theory

- Goals tell an employee what needs to be done and how much effort is needed
- **Specific goals** produce a higher level of output than the generalized goal
- **The more difficult the goal** (with-in the capabilities). , the **higher the level of performance** . Once a hard task is accepted, we can expect the employee to exert a high level of effort to try to achieve it
- **People do better** when they **get feedback** on how well they are progressing toward their goals

What does SMART stand for?

S

Specific

What is the goal?

I want to cut the 6 hours I spend processing data in Excel every day to 3 hours by implementing an improved work routine.

M

Measurable

How will I measure my progress?

I'll track the time I spend processing Excel data every day, and watch as the time decreases.

A

Attainable

Do I have the skills and the resources for it?

I have access to Excel eBooks that will help me learn how to be more efficient when using Excel formulas.

R

Relevant

Why is this goal important?

I spend 6 hours processing data in Excel, and that's too much of my time. Cutting that time in half would ensure I have more time for other work activities.

T

Time-bound

When will I achieve the goal I've set?

I want to cut the time I spend on Excel calculations in half by the 15th of next month.

Management by Objectives (MBO)

Management by Objectives (MBO) is a management system that helps organizations set and achieve goals by involving employees in the process. MBO is also known as Management by Results (MBR).

How it works

2. Set goals that are specific, measurable, and agreed upon by management and employees
3. Develop action plans to achieve the goals
4. Regularly monitor progress
5. Evaluate performance against the goals
6. Reward achievements

Benefits of MBO Encourages employee participation and engagement, Promotes self-growth, Enhances communication, Helps align objectives across the organization, and Motivates employees to achieve defined targets.
